

PUBLIC EMERGENCY ALERT NOTIFICATION SYSTEM

Get public safety messages sent directly to your phone or email. Emergency messages could include emergency evacuation notices, public safety/life safety notifications, hazardous chemical emergencies, snow emergencies, and road closures. Non-emergency messages will also be sent. Non-emergency messages could include reminders about water main breaks, rescheduled garbage and recycling collection days, special Village office hours, reminders about election days, and other information important to our Combined Locks residents. You can also choose to receive weather alerts issued by the National Weather Service through AtHoc.

You may already be registered for AtHoc through Outagamie County, and you may already be receiving weather alerts. If so, there is nothing more you need to do. If you have a family member or friend who could benefit from our community notifications, please have them call the Clerk's Office at 920-788-7740 ext. 203 or send an email to gieser@combinedlocks.wi.gov. New users can also register on their own: <https://alerts5.athoc.com/SelfService/OutagamiePublic/Register>

Thank you to Outagamie County Emergency Management for this partnership!
