Cross Connection Inspections

To keep the water system safe from contaminants and pollutants, the Village is required to maintain a cross-connection control program. Additionally, the Village is installing smart meters to help residents keep better track of their water usage and be alerted to leaks.

We need to complete 300 cross-connection inspections and install 300 new water meters this fall. Letters will be mailed to residents in the section of the Village affected. If you receive a letter, please make your appointment as soon as possible.

Your cooperation is appreciated!
